

## Profile

---

I come from a family of artists. My mom is a painter, and my dad has a badass beard design. But I attribute my talent to hard work + curiosity. I began my artistic career as a faux finish artist. I enjoyed using my creativity on a daily basis, but I still felt like I could do so much more. So I found my niche in graphic arts and art direction, which never felt like work. It feels like underpants that fit really well.

And I love well-fitting undies; that's why I love this stuff.
